The complete solution for professional networks!

The Full version offers the complete range of IACBOX features: maximum performance and flexibility. It's designed for large hotels, resorts, clinics, universities, public institutions and corporate networks with the highest demands.

Scalable from 10 to unlimited concurrent users/devices. It includes all the features of the Lite and Pro versions, plus advanced interfaces such as PMS integration, payment gateways, batch API, webhooks, VLAN support, monitoring, and reporting. External authentication services such as Microsoft Entra ID are fully supported.

Available as software or a virtual appliance. Software maintenance is renewed annually, with the first year being mandatory.
