IACBOX LITE

- 25 - 250 concurrent devices
- Low starting price
- Software or virtual appliance
- Software Maintenance
- Upgradeable to the full version
- Optional: iacbox.cloud

The simple license for small networks!

The typical areas of use for the Lite version include small hotels and guesthouses, restaurants, cafés, retail stores and public spaces. Since the package of modules and features is more streamlined than in the full version, the price is especially attractive.

If you don't need database connectivity, bulk ticket creation or online payment methods, the Lite version is ideal. Up to 250 concurrent users/devices can go online, and the login page can be customized. Login via Facebook or Google is also possible. The optional Privacy Toolkit helps you comply with data protection requirements.

The Lite version is available as software or as a virtual appliance for 25, 50, 75, 100, 175, and 250 concurrent users/devices. If that's not enough, you can later upgrade to the Pro or Full version. Within the EU and EFTA regions, we can also supply matching hardware upon request. Software maintenance is renewed annually, with the first year being mandatory.
