IACBOX PRO

- 25 - 1.500 concurrent devices
- Attractive price
- Software or virtual appliance
- Software Maintenance
- Upgradeable to the full version
- Optional: iacbox.cloud

The smart license for growing networks!

The Pro version expands the IACBOX with essential features: powerful, flexible, and cost-effective. It's designed for businesses and organizations that need more than the Lite version offers but don't require the full range of the Full version.

Up to 1,500 concurrent users/devices can be managed. It also includes advanced features such as user group management, comprehensive voucher, ticket management and messaging. PMS integration is available upon request. When combined with iacbox.cloud, you benefit from centralized management and efficient administration.

Available as software or a virtual appliance for 25 to 1,500 users/devices. An upgrade to the Full version is possible at any time. Software maintenance is renewed annually, with the first year being mandatory.
